### COMMERCIAL OFFER

Our company is ready to provide glazing of LIGHT-TRANSPARENT CONSTRUCTIONS of any complexity of any configuration.

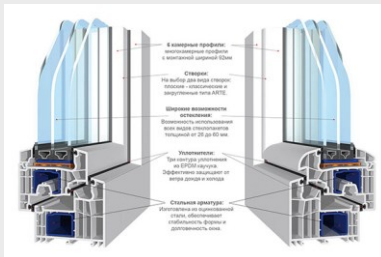

Profile system **Salamander Streamlain**

- A unique, modern **five-chamber** design with two levels of sealing.

Specifications:

- Sound insulation up to 33 dB;
- Thermal insulation for a five-chamber profile of 1.3 V / m<sup>2</sup>K;
- Thermal insulation for the seven chamber profile 1.2 V / m<sup>2</sup>K;
- Systems of both five and seven chamber.

Unlike some manufacturers, which are tied to the market conjuncture, the company did not go down the path of reducing prices by reducing some of the quality characteristics.

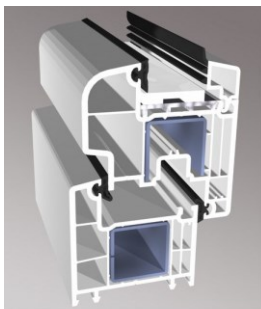

Profile system **Salamander bluEvolution**

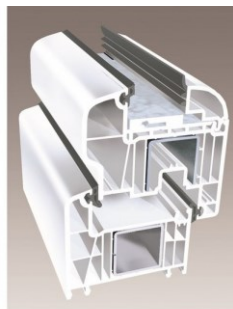

**Specifications:**

- Total mounting width 92 mm, 6 chambers in the frame and leaf;
- Unprecedented glazing thickness up to 60 mm;
- Uniform reinforcement for frame and sash;
- Sealing system with two rebated and one central seal;
- reduced resistance to heat transfer from 1,0 m<sup>2</sup>x0C / W to 1,25 m<sup>2</sup>x0C / Wt.

Summarizing, we can with all boldness declare that the system bluEvolution 92 is the best choice for builders and designers, striving for maximum heat savings and overall energy efficiency of buildings.

### Window profile **Decco**

The window profile of the Polish company **Decco** has perfectly proved itself in the Ukrainian market. Quality, technological indicators and price are successfully combined with an elegant innovative design. The system is favorably distinguished by soft forms, ideal gloss, perfect whiteness. These qualities will not lose their properties during the operation of the product and will be pleasing to the eye for many years. The given system has two types of sash (flat and half-suited), which introduces a variety in the solution of various architectural and design tasks.

**4-x Chamber profile system** with a classic design. The peculiarity of this system is a glossy surface and an ideal white color. The mounting width is 60 mm, the groove is located 13 mm to the axis, and the width of the insulating glass is 4 mm to 32 mm, the bead with the co-extruded seal.

**6-ти Chamber profile system** with a classic design. The peculiarity of this system is a glossy surface and an ideal white color. The presence of six chambers significantly improves the heat-shielding parameters of the profile. Windows from this profile are a profitable investment in home heat insulation. Mounting sheath 70 mm, fitting groove placed at a distance of 13 mm to the axis, the width of insulating glass from 4 mm to 32 mm, bead with co-extruded seal.

We guarantee the high quality of the product, which is in full compliance with the quality certificates of DSTU B B.2.6-15: 2011 "National standard of Ukraine for PVC windows and doors" subject to the rules of operation and climatic norms stipulated in SNIP 2.04.05-91 "Heating, Ventilation and Condensing air ", as well as provide free warranty service for 5 (five) years.
