

NASAL ASPIRATOR for babies

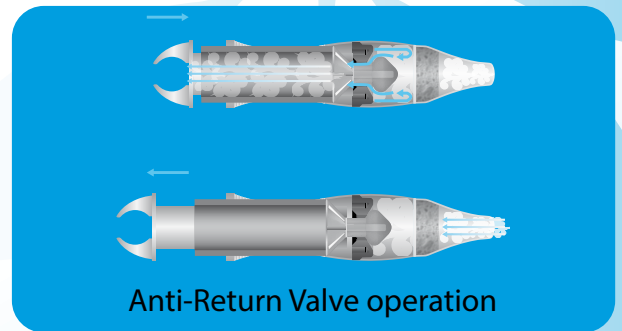

The nasal aspirator more hygienic and comfortable for your baby to breathe well and smile again.

NASAL ASPIRATOR

2 aspirators and 2 cannulas with built-in filters.

The nasal aspirator is ergonomically designed to clear mucus from your baby's nose in a **HYGIENIC** and **COMFORTABLY** manner, simply using one hand and regulating the intensity of the aspiration.

Anti-Return Valve operation

The advanced design allows a single cannula to remove mucus from the baby's nostrils.

With disposable cannulas soft texture.

* Easy and convenient to use with one hand.

You can repeat this operation as often as necessary without removing the cannula of the baby's nose.
