Vitamin-enriched Milk

(baby food)

Yagotynske for Children sterilized vitamin-enriched cow milk is a product of the highest quality, developed specifically for children of early age. Vitaminized milk formula meets children's daily requirements in proteins, calcium and vitamins. The product is manufactured from selected whole cow milk, which undergoes cleaning with a bactofuge, heat treatment, normalization of fat, and is additionally enriched with vitamins A, D, E.

Yagotynske for Children milk has homogeneous structure and clear milky smell and taste. The colour is white, homogeneous within all the mass, with light creamy hint.

The product is intended for children aged 9 months and up as complementary food, and also in diluted form as a basis for dairy meal preparation for children, aged 6 months and up.
