Covid-19 Rapid Test Kit

Testsealabs Covid Antigen Test Cassette

Art. Ref: PBLCATK05

Designed for the qualitative detection of SARS-CoV-2 antigen on swabs

The Covid-19 Antigen Test Cassette is a rapid chromatographic immunoassay for the qualitative detection of COVID-19 antigen in a nasopharyngeal swab sample to aid in the diagnosis of COVID-19 viral infection.

Product main features:

- Test time: in 15 minutes / Sensitivity: 92.1%; 95% CI: 87.7% - 93.9%) / Specificity: 98.3%; 95% CI: (8;94.2% - 100%) / Sample: swab / Storage state: 4 - 30°C
- **Shelf life:** 2 years / Available formats: Box of an individual Test, Box of 20 Tests.

One individual test box content: 1 test cassette, 1 sterile swab, 1 extraction tube, 1 product leaflet.

Contained in a box of 20 units: 20 test cassettes, 20 sterile swabs, 20 extraction tubes, 20 product inserts, 20 extraction buffers.

Testsealabs® (COVID-19 SARS-CoV-2) Antigen Schnelltest (BfArM GZ: 5640-S-214/21)

Example type:

Anterior nasal swab, non-invasive and painless sampling;

- Easy to operate, suitable for COVID-19 family and individual self-test;
- Self-test, continuous self-monitoring of health status, early detection, early isolation, early treatment
- High sensitivity, forms the first line of defense against COVID-19 detection, reduces pressure from medical institutions
- Suitable for multiple scenarios:

Tests in medical institutions; screening before resuming work and school, continuous monitoring, etc.

- All necessary reagent is provided and no equipment is required;
- Time-saving procedures, results are available in 15 minutes;
- Storage temperature: 4 ~ 30 °C No need for cold chain transport;
- Specification: 20 tests / box, 5 tests / box, 1 test / box.
