Somos

We are an interdisciplinary group of professionals who decided to join our experiences to develop, administer and manage our cannabis license, by developing the cultivation and creation of products.

Our company currently has a cultivation of approximately 2,000 plants in periodic planting cycles established in a standardized bimonthly manner.

We have standardized processes throughout the production process, from planting to harvesting. We have our own platform for traceability, which is our web support tool for the agricultural sector development, which offers great value interactive information.

OUR LOCATION

- We have 2,000 square meters of greenhouses.
- We establish the components of our substrate.
- Calculation to prepare the required area.
- Substrate disinfection.
- We carry out the sowing.
- We evaluate the rooting and strengthening of all plant material.
- In each planting we make a phytosanitary management.
- We control the light during flowering and vegetative stage.
- We adequately manage the fertigation process.
- We carry out formation and maintenance pruning.
- We carry out the process of harvesting, packing, continuous control and storage.

CORPORATE AND SOCIAL POLITICS

- Innovation, study and medical-scientific research, with clean technologies, organic raw materials, conservation and protection of the environment.
- Be leaders in the construction and recovery of the social fabric, with programs for the prevention of human consumption of narcotics and the rehabilitation of those affected.
- Implement and develop processes and products with the highest quality standards.
- Contribute to the improvement of the quality of life, health and nutrition of humans and animals.
- Gratitude, consideration, respect, ethics and responsibility for those who place their trust in our production line.
- Linking society and authorities in social responsibility programs, being a national and international reference.
- Social responsibility programs, being a national and international reference.
